

# NSC Moosomin RR2Y

NSC Moosomin RR2Y is one of the earliest maturing RR2Y soybean varieties available in Western Canada. This variety offers growers in the short-season zones of Saskatchewan a whole new cropping opportunity. Even for growers in the longer growing season, NSC Moosomin has proven to be a very good yielding variety.

## Key Strengths

- Excellent fit for row spacing of less than 10 inches
- Ultra early maturity
- Will present a new cropping opportunity for many growers in short-growing areas

CHARACTERISTICS			
Maturity	Ultra Early	Flower Colour	Purple
Heat Units	< 2300 CHU	Pubescent Colour	Tawny
Phytophthora	9	Hilum Colour	Black
Growth Habit	Indeterminate	Plant Height	Medium
Adaptability	8	Emergence	8
Standability	9	White Mould	8
Seedling Vigor	7	IDC	7

Rating Scale: 1-2 Poor, 3-4 Fair, 5-6 Good, 7-8 Very Good, 9-10 Excellent
