

NSC Reston RR2Y

NSC Reston RR2Y has become the variety of choice for soybean growers in western Manitoba and eastern Saskatchewan. In all our demonstration plots and third party variety trials, NSC Reston shows very consistent and competitive yields. With NSC Reston RR2Y, you get very early maturity plus very good yield as this variety has been reported to yield over 50 bushels per acre by many growers.

Key Strengths

- Very early maturing - rated at 2325 CHUs
- Most popular variety in western Manitoba and eastern Saskatchewan
- Very stable yielder under a wide range of environmental conditions
- Semi-bush growth habit for good canopy closure, so can be grown at row spacings up to 15 inches

CHARACTERISTICS			
Maturity	Very Early	Flower Colour	Purple
Heat Units	2325 CHU	Pubescent Colour	Tawny
Phytophthora	K-Gene	Hilum Colour	Black
Growth Habit	Indeterminate	Plant Height	Tall for maturity class
Adaptability	8	Emergence	9
Standability	9	White Mould	7
Seedling Vigor	8.5	IDC	6-7

Rating Scale: 1-2 Poor, 3-4 Fair, 5-6 Good, 7-8 Very Good, 9-10 Excellent
